

October 13, 2025: On Additional Methods of Agitation and Oppression

I am writing to record another method of agitation and oppression that I regularly experience while it is fresh in my mind from have been used against me in the minute or so preceding this message:

1. Use of 'markers' that define when I begin an activity and when I end an activity.

This is a regularly used method of proof that shows that I am being spied upon in my yard and inside of my home.

I have regularly experienced the use of vehicles being coordinated to drive past my home to directly coincide with the beginning of a new activity and the ending of that activity.

Just now, the markers were at the beginning of making a bagel, and at the end of finishing the cream cheese. Just in this past week, I experienced that a vehicle drove past my home each and every time that I completed the cuts of a 1/4 of 2 bell peppers (that is a vehicle driving past our home after completing the individual dicing of 8 chunks of peppers - 8 times in a row).

Marker A, beginning activity; Marker B, ending of activity (repeat endlessly).

This also occurs regularly with additional supplementary stimuli to indicate memory-game signs within the activity as well, often incorporating imagery of bowing, circumcision, and removal of family trees.

These are highly inflammatory invasions into my personal life and are regularly exercised as agitations and escalations to the discomfort that is caused by facing an unlawful and illegal spying presence over my home.

I am publicly testifying that Donald Trump is a felon that is convicted of misleading the government about his activities to 'suppress' and 'oppress' a woman that held information that he believed to be damaging to his reputation.

The elements of Donald Trump's conviction are for misleading and lying, misdirecting financial resources, covering up the misdirection of those financial resources, and

Also include the elements of oppressing other people and silencing other people for his own personal reputation and desires to gain political power.

Donald Trump's team has regularly shown to me that they are still engaging in an ongoing attempt to forcefully oppress American citizens and people around the world by any means necessary in order to 'blot out' and 'cover-up' the immoral and illegal actions of their leader / slave-owner.
